

## Setting up SSBG Premier Email Active Sync on Android phones

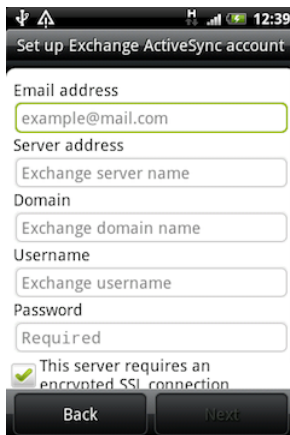

SSBG Premier Email uses the "Exchange" setting features on the Android. Follow the below steps:

In "Setting" page, choose "Account & sync", press "Add account" and then choose "Exchange ActiveSync"

(You can only use one ActiveSync account on your HTC phone, you may need to remove previous account)

Select the option for Manual Setup:

Enter your full email address like "**user@company.com**".

In the Server Address field please enter "**mail.ssbg.com.cn**".

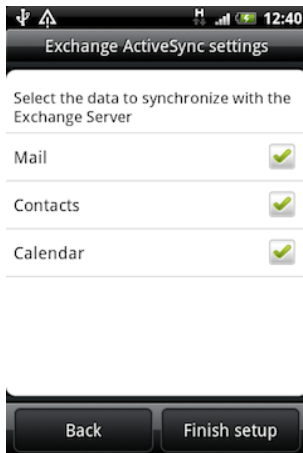

In the Domain field please enter "**[empty]**"

Then enter your username and password like "**user@company.com**" as username

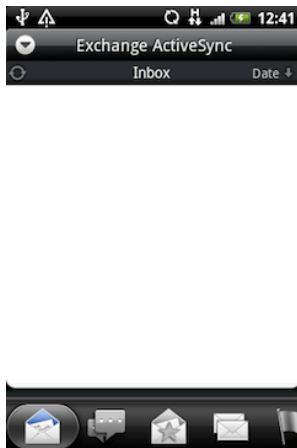

Make sure "This server requires an encryption SSL connection" was unchecked.

Tap Next. You may be warned that the identity of the certificate cannot be verified, select the option to Continue:

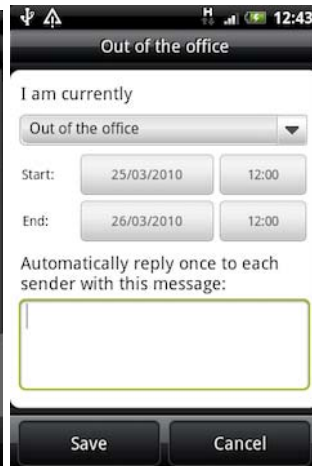

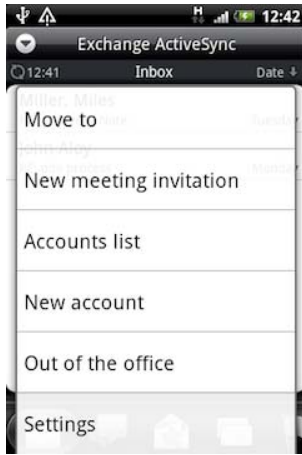

Select which mailbox data you want to synchronize, normally you can only check "Mail".

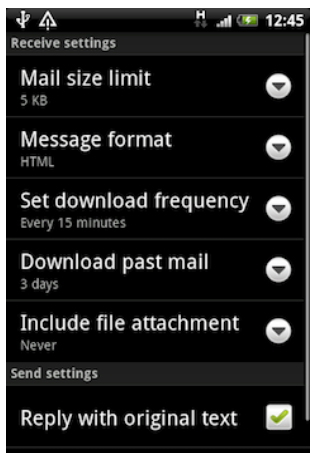

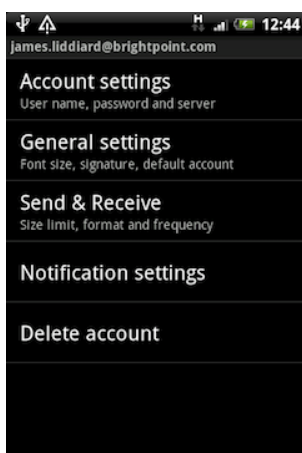

Your mailbox data will now be synchronized. This may take a few moments depending on how much data is in your mailbox and which options you selected to sync.

Within the menu you can access Out of Office settings:

The Settings menu allows you to define how far back into the past you synchronize as well as how often mail is delivered:

NOTE - the default selection is for mail to be delivered every 15 minutes, so to enable true push you will need to adjust this option to "As items arrive":
